

8-segment redundant fieldbus power system for use with Yokogawa CENTUM 3000 R3 Control System

F880

- ◆ Integrated redundant fieldbus power for ALF111 FOUNDATION fieldbus™ cards
- ◆ High-density, compact design
- ◆ Fully isolated
- ◆ Hot swappable power modules*
- ◆ Low power dissipation
- ◆ Zero component carrier
- ◆ On-line diagnostics option
- ◆ Redundant power & conditioning
- ◆ Vertical DIN-rail mounting
- ◆ F801 output 21.5V, 350mA
- ◆ F802 output 28V, 500mA

The **F880 fieldbus power system** is designed to provide redundant power for eight FOUNDATION fieldbus™ H1 segments when used with Yokogawa ALF111 fieldbus cards. The F880 module carrier has system connectors for direct connection to two redundant pairs of fieldbus cards using Yokogawa AKB336 cables. Power for the fieldbus segments is provided by two power modules - F801s or F802s - operating in a redundant configuration (load sharing). Failure alarms, galvanic isolation, power conditioning and segment termination are incorporated into each F80x module. In simplex applications, a single F80x module may be used. Termination of the fieldbus segments is automatically maintained when single or redundant F80x modules are fitted.

For extreme reliability, the module carrier has no components and only provides interconnections between the power modules and external connections. It is supported in a rigid metal frame that protects the circuit board from mechanical damage. Secure DIN-rail mounting is provided by integrated fixings.

Each F80x module monitors the output of the eight fieldbus segments and indicates an alarm, by means of a built-in, normally closed relay, if any of the segments is shorted or below the minimum output voltage threshold. Failure of either of the bulk power input supplies is also annunciated. The alarm contacts are volt-free and galvanically isolated from other circuitry. Connections to the alarm relays are made via terminals on the F880-Cx carrier. A separate alarm module is not required for this function. LED indicators also show the status of each F80x module and the eight individual segments. In normal operation,

each segment LED is lit, showing that the segment is powered. If a segment is shorted, this LED is extinguished, and the module Alarm LED is lit.

A separate physical layer diagnostics module may be installed on the carrier to automatically collect and distribute additional diagnostic information for each of the eight fieldbus segments. For more information see the F809F product specification.

The F80x module provides galvanic isolation between the 24V DC input power and the fieldbus segments, as required by the IEC61158-2 fieldbus standard and the Fieldbus Foundation™ FF-831 validation test for fieldbus power supplies. There is also galvanic isolation between the fieldbus segments, thereby preventing multiple segment failures due to ground faults on more than one segment. Each segment has its own fieldbus power conditioner and current limitation.

Redundant 24V DC (nom.) input power is connected to the F880 carrier using two-part pluggable connectors. Field wiring connections are available with either pluggable screw terminals (F880-xS) or pluggable spring clamp terminals (F880-xC).

Three variants of carriers are available in the F880 family, to be used in two different types of installations. For large installations, where multiple F880 systems will be installed in a cabinet, there are Left (F880-CL) and Right (F880-CR) hand versions that make cabinet wiring symmetrical. In smaller installations, where carriers are not installed side-by-side, the F880-CA carrier provides terminal numbering and consistent connector polarity.

* Gas clearance certificate needed in Zone 2 hazardous areas

SPECIFICATION

Location of equipment

Safe area,
Class I Div 2 Groups ABCD T4 or
Class I Zone 2 IIC T4

INPUT	F801	F802
Input voltage (DC)	19.2 - 30.0V	19.2 - 30.0V
Current consumption (24V input, all outputs fully loaded)	3.5A*	6A*
Total Power dissipation (24V input, all outputs fully loaded)	20W*	24W*

* Redundant operation

OUTPUT	F801	F802
Number of channels	Eight (8)	Eight (8)
Voltage (DC)	21.5V - 24.0V	28.0V - 30.0V
Design current (per segment)	0 to 350mA	0 to 500mA
Current limit	> 370mA	> 520mA
Minimum load	0mA	0mA
Isolation	Fieldbus to input power: 250V AC rms withstand Segment to segment: 200V DC withstand	

ALARMS

Alarm contact rating

1A maximum @ 30V DC maximum

Alarm contact status

Normally closed

Alarm threshold

	F801	F802
Segment output	<19V DC	<24V DC

ELECTRICAL CONNECTIONS

System connectors

Host 1A, Host 1B, Host 2A, Host 2B via AKB336 cables to ALF111 modules

Field, Power & Alarm terminals

Pluggable rising cage-clamp screw terminals (-PS)
Conductor size: 0.14 to 2.5 mm²
Pluggable spring-clamp screw terminals (-PC)
Conductor size: 0.2 to 2.5 mm²

Chassis ground

2-way fixed screw terminal connector 0.14 to 2.5 mm²

Terminators

A single termination is provided automatically when using either 1 or 2 power modules

ENVIRONMENTAL

Ambient temperature	F801	F802
Operating (full load)	-40°C to +65°C	-40°C to +50°C
Operating (60% load)	-40°C to +65°C	-40°C to +65°C
Storage	-40°C to +85°C	-40°C to +85°C

Note: Temperature range applies only when mounted on a vertical DIN rail.

Ingress protection

IP20 to BS EN60529 (Additional protection by use of enclosure)

MECHANICAL

Mounting method

Integrated fixings for 'Top hat' DIN rail, 35mm x 7.5mm to EN50022

ELECTRICAL

EMC Compliance

To EN61326:1998 Electrical equipment for measurement, control and laboratory use - EMC requirements

F880 - BLOCK DIAGRAM

The above diagram shows a block diagram of how the F880 is wired. Note that the Chassis Ground and Alarm connection are not shown. The Diagnostic module is also not shown (see the F809F product specification). For detailed wiring information see the Installation Instructions for the F880 (Document number 502-089).

PHYSICAL NETWORKS

IEC61158-2
ISA-S50.02 Part 2-1992
FOUNDATION fieldbus™ H1
Profibus PA

ORDERING INFORMATION

DESCRIPTION	PART NO.	
Carrier, unpopulated	F880-CA-P*	
Left hand carrier, unpopulated	F880-CL-P*	
Right hand carrier, unpopulated	F880-CR-P*	
8-segment power module: 21.5V, 350mA	F801	
8-segment power module: 28V, 500mA	F802	
Blanking modules included with -NR systems	F800-BLK	
Fieldbus diagnostic module	F809F	
F880-CA-P* and two F80x modules	with F801	with F802
F880-CL-P* and two F80x modules	F880-P*	F880-2-P*
F880-CR-P* and two F80x modules	F880-L*	F880-2-L*
	F880-R*	F880-2-R*
F880-CA-P* and one F80x module	F880-P*-NR	F880-2-P*-NR
F880-CL-P* and one F80x module	F880-L*-NR	F880-2-L*-NR
F880-CR-P* and one F80x module	F880-R*-NR	F880-2-R*-NR
