

A large offshore oil or gas platform stands in the ocean at sunset. The sky is filled with warm orange and yellow hues, reflected in the water below. One of the platform's tall derrick structures has a flame arrester at the top, from which a bright orange flame is visible, indicating active production or burning off excess gas.

Powering Business Worldwide

With a comprehensive range of Integrated IS, Network Security, Wireless, HMI displays, FOUNDATION™ fieldbus and Surge protection solutions, MTL are committed to providing Yokogawa and its customers the best in quality, reliability, safety and value.

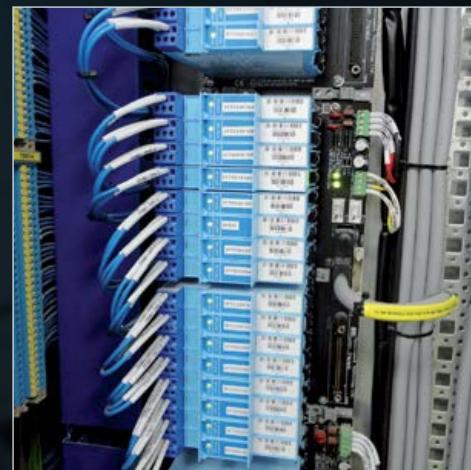

Introduction

MTL has a long history of providing solutions to Yokogawa for intrinsic safety applications from the early Centum XL and ProSafe to the latest Centum VP and ProSafeRS systems.

MTL is a renowned and respected supplier for intrinsic safety with over 40 years experience in the industry. The interface solutions provided meet all the requirements for worldwide applications.

MTL's IS barrier ranges include the MTL7700 series zener barriers, MTL5500 series DIN rail isolators and the MTL4500/4600 series backplane mounted isolating barriers. The backplane mounting ranges provide the integrated designs for direct cable connection to the system cards.

In addition to the IS interfaces MTL also manufacture a range of general purpose termination boards for Centum VP and ProSafeRS.

Product Range overview

CPY-C3 series

An extensive range of backplanes, for use with the MTL4500 series IS isolators and the MTL4600 general purpose range. Single, dual and 4 channel isolator options address the end users requirements for loop integrity and, where needed, the highest possible packing density.

CPY-RS series

MTL's range of backplanes address the requirements for safety applications. MTL4500 series isolators are functional safety assessed for such applications to the latest standards. Signal conditioning and diagnostics are available to provide the user with all the information required for reliable plant operation.

YTB-VP series

For use with the Centum VP these provide a remote cable connected interface for field wiring.

YTB-RS series

This series is designed with 2 rows of terminals to provide a compact interface. Each interface is supplied in a carrier for direct DIN rail mounting.

YTA series

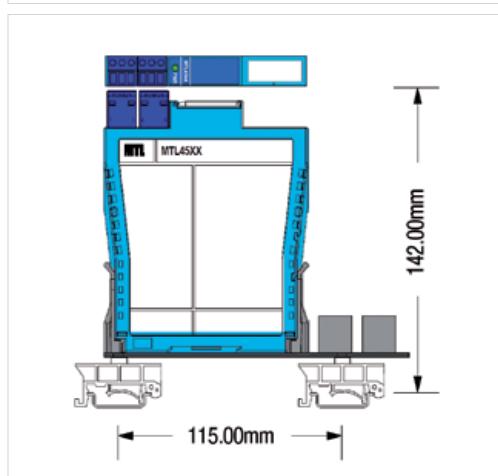

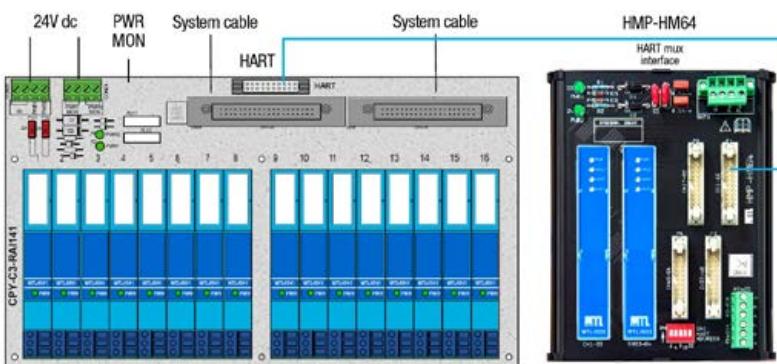

Similar to the YTB series, the YTA provides single row terminals where stacked terminals are not the preferred solution.

Yokogawa Centum VP and ProSafe RS integrated solutions

MTL4500 series IS interfaces

Both the Centum and ProSafe solutions are based on the same format 8 and 16 way backplanes designs. MTL backplanes may be surface or dual DIN rail mounted.

All MTL4500 series analogue input and output modules are HART compatible. HART is passed directly through to HART compatible system cards. Alternatively the backplanes may be used to extract the HART data into a separate maintenance system via the MTL4800 series HART multiplexer products.

For digital signals, isolators may be chosen to provide line monitoring on both inputs and outputs. A wide range of backplanes are provided to offer single, dual and 4 channel isolator options for majority of Yokogawa system IO modules.

Intrinsically safe solutions you can profit from...

Centum VP MTL4500 Series Interfaces

A range of dedicated backplanes and connections units are available to interface with MTL4500 series intrinsically safe isolator modules and the MTL HART maintenance system products.

| I/O module | Backplane | Function | MTL module | Cable | Red'nt |
|------------|--------------------|-----------------|--------------------------------|--------|--------|

Note: Compatible module alternatives

MTL4516 specified, MTL4513 is compatible

MTL4524 specified, MTL4525 is compatible. *NOTE: in Off state max output voltage is 4V open circuit.

MTL4541 specified, MTL4532 in pulse to current mode, MTL4541A or MTL4575 are compatible.

ProSafe RS

MTL4500 series interfaces

A dedicated range of backplane interfaces are available to interface the ProSafe RS safety system with MTL4500 series intrinsically safe isolator modules and the MTL HART maintenance system.

| ProsafeRS IO module | Backplane | Function | MTL module | Redundant cable connection |
|------------------------|------------------|-------------|---------------------|-------------------------------|
| SAI143(-H) | CPY-RS-AI16-KS | 16ch AI | MTL4544/44A | KS1 |

Signal Isolation - MTL4600 series

The MTL4600 series isolator range provides channel to channel signal isolation when used with Centum VP or ProSafeRS in non-intrinsically safe applications. 1500Vac isolation is provided, this protects the system cards from high common mode voltages, that can occur under fault conditions.

The MTL4600 modules are used with the appropriate CPY backplanes described earlier.

Centum VP / ProSafe RS Termination Boards

YTB series - These termination boards provide remote terminations via standard cable connections to the Centum VP and ProSafe RS systems. All interfaces are supplied in carriers for DIN rail mounting. Dual power supplies and power monitoring are provided, where required. Double row field terminals to provide maximum packing density.

| Product number | IO card | Function |
|-----------------|--------------------------|--|
| | CENTUM VP | |
| YTB-VP-AI16-KS | AAI141/143 16 | channel analogue input |
| YTB-VP-AI016-KS | AAI143/543 AAI135/835 | 16 channel analogue input and output 8ch AI and 8ch AO isolated |
| YTB-VP-DI32-AKB | ADV151/161 | 32 channel digital input |
| YTB-VP-R032-AKB | ADV551/561 | 32 channel relay output |
| | PROSAFE | |
| YTB-RS-AI16-KS | SAI143 | 16 channel analogue input |
| YTB-RS-A08-KS | SAI533 | 8 channel analogue output |
| YTB-RS-DI16-AKB | SDV144 | 16 channel digital input |
| YTB-RS-D08-AKB | SDV531 | 8 channel digital output |
| YTB-RS-D016-AKB | SDV541 | 16 channel digital output |

YTA series - These termination boards provide remote terminations via standard cable connections to the Centum VP and ProSafe RS systems. All interfaces are supplied in carriers for DIN rail mounting. Dual power supplies and power monitoring are provided, where required. Single row field terminals are fitted where customer requirements specify this.

| Product number | IO card | Function |
|-----------------|------------|-------------------------------|
| | CENTUM VP | |
| YTA-C3-AI016-KS | AAI143/543 | 16ch Analogue input or Output |
| YTA-C3-DI32-AKB | ADV151 | 32ch |
| | PROSAFE | |
| YTA-RS-AI16-KS | SAI143 | 16ch AI |

Centum VP & Stardom FOUNDATION™ fieldbus

91xx & F10x Series conditioned Fieldbus power supplies

| Type | MTL model number | Compatible with |
|-------------------------------------|------------------|--|
| 8-segment N+1 redundant, 500mA | 9188-91-Px | Yokogawa ALF111 H1 interface via AKB336 cables |
| 8-segment N+1 redundant, 250mA | 9188-61-Px | |
| 4-segment N+1 redundant, 500mA | 9188-41-Px | |
| 8-segment N+1 redundant, 250mA | 9188-21-Px | |
| 1-segment simplex, 21.5V, 500mA | F101-Px | Yokogawa ALF111 or NFLF111 H1 interface |
| 1-segment simplex, 29.7V, 500mA | F102-Px | |
| 1-segment simplex (Eco), 13V, 250mA | F104-Px | |
| 4-segment FISCO redundant | 9108-22-Px | Yokogawa ALF111 H1 interface via AKB336 cables |

FS32 Pluggable trunk surge protector

- Redundant fieldbus power for FOUNDATION™ fieldbus cards
- Flexible N+1 redundancy
- Can reduce initial capital cost by 25% whilst supporting future expansion
- Fully isolated hot-swappable power modules
- Low power dissipation
- On-line diagnostics option
- Pluggable trunk surge protection option
