9299-PSE

Industrial Power Over Ethernet (PoE) Injectors

- Simplify system wiring
- Reduce maintenance time
- Save money
- Fully IEEE 802.3af compliant PSE (Power Sourcing Equipment) operation
- 9299-PSE24A/B directly runs off existing 24V DC and powers one PoE (48 VDC) port
- 9299-PSE48A/B saves space and money by powering two PoE (48 VDC) ports
- Industrial rated for -40 to 75°C operation

The 9299-PSE24A/B or 9299-PSE48A/B industrial PoE power injectors add 48V DC power into one or two Ethernet ports so that both power and data can be passed over the same wire to Ethernet devices in the field. The PSE24A/B models step up a 24V DC source to power a single PoE port, avoiding the need for a separate DC/DC converter. The PSE48A/B models provide two injectors in one package to save both space and money. Both models are ultra-rugged, reliable and easy to use.

IEEE 802.3AF COMPLIANT POE PORTS

- Power Sourcing Equipment (PSE) operation
- Auto-detection of PD (powered devices)
- Supplies up to 15.4 watts per channel
- Over-temperature and over-current detection
- Over and under-voltage protection

TRUE PLUG AND PLAY SIMPLICITY

- No user settings
- Ready to use right out of the box

TROUBLE FREE OPERATION

- Ultra-reliable 1,000,000+ hours MTBF
- Slim package for DIN rail or panel mounting
