# MTL1142 Transmitter **Power Supply**

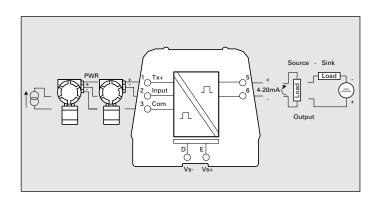

## 1 Channel, Smart for 2/4-wire transmitters

The MTL1142 is a Single Channel Analogue Input isolator with current source or current sink output (switch selectable). HART communication is provided for Smart two wire transmitters. The transmitter can be interrogated either from the operator station or by a hand-held communicator (HHC). Power for this module is supplied via the power

bus embedded in the DIN rail.

The PBUS6.2 kit must be ordered separately. 10 x 2 way power clips are provided to power 20

The MTL1991 is used to feed power onto the bus.
