

# F880-RT

## Redundant fieldbus power for Yokogawa CENTRUM 3000 R3 control system

- **Integrated redundant fieldbus power for ALF111 FOUNDATION™ fieldbus cards**
- **8-segment redundancy**
- **High-density, compact design**
- **Fully isolated**
- **Hot swappable power modules\***
- **Low power dissipation**
- **Zero component carrier**
- **On-line diagnostics option**
- **Redundant power & conditioning**
- **Vertical DIN-rail mounting**
- **F801 output 21.5V, 350mA**
- **F802 output 28V, 500mA**

The **F880-RT fieldbus power system** is designed to provide redundant power for eight FOUNDATION™ fieldbus H1 segments when used with Yokogawa ALF111 fieldbus cards. The F880-CA-RT module carrier has system connectors for direct connection to two redundant pairs of fieldbus cards using Yokogawa AKB336 cables.

**Power for the fieldbus segments** is provided by two power modules - F801s or F802s - operating in a redundant configuration (load sharing). Failure alarms, galvanic isolation, power conditioning and segment termination are incorporated into each F80x module. In simplex applications, a single F80x module may be used. Termination of the fieldbus segments is automatically maintained when single or redundant F80x modules are fitted.

**For extreme reliability**, the module carrier has no components and only provides interconnections between the power modules and external connections. It is supported in a rigid metal frame that protects the circuit board from mechanical damage. Secure DIN-rail mounting is provided by integrated fixings.

**Each F80x module monitors the output** of the eight fieldbus segments and indicates an alarm, by means of a built-in, normally closed relay, if any of the segments is shorted or below the minimum output voltage threshold. Failure of either of the bulk power input supplies is also annunciated. The alarm contacts

are volt-free and galvanically isolated from other circuitry. Connections to the alarm relays are made via terminals on the F880-CA-RT carrier. A separate alarm module is not required for this function. LED indicators also show the status of each F80x module and the eight individual segments. In normal operation, each segment LED is lit, showing that the segment is powered. If a segment is shorted, this LED is extinguished, and the module Alarm LED is lit.

**A separate physical layer diagnostics module** may be installed on the carrier to automatically collect and distribute additional diagnostic information for each of the eight fieldbus segments. For more information see the F809F product specification.

**The F80x module provides galvanic isolation** between the 24V DC input power and the fieldbus segments, as required by the IEC61158-2 fieldbus standard and the Fieldbus Foundation™ FF-831 validation test for fieldbus power supplies. There is also galvanic isolation between the fieldbus segments, thereby preventing multiple segment failures due to ground faults on more than one segment. Each segment has its own fieldbus power conditioner and current limitation.

**Redundant 24V DC** (nom.) input power is connected to the F880-CA-RT carrier using ring terminals that are attached to the barrier strip on the carrier. Field wiring connections are made in the same manner.

## SPECIFICATION

### Location of equipment

Safe area,  
Class I Zone 2 IIC T4

### INPUT

	F801	F802
<b>Input voltage (DC)</b>	19.2 - 30.0V	19.2 - 30.0V
<b>Current consumption</b> (24V input, all outputs fully loaded)	3.5A*	6A*
<b>Total Power dissipation</b> (24V input, all outputs fully loaded)	20W*	24W*

\* Redundant operation

### OUTPUT

	F801	F802
<b>Number of channels</b>	Eight (8)	Eight (8)
<b>Voltage (DC)</b>	21.5V - 24.0V	28.0V - 30.0V
<b>Design current (per segment)</b>	0 to 350mA	0 to 500mA
<b>Current limit</b>	> 370mA	> 520mA
<b>Minimum load</b>	0mA	0mA

### Isolation

Fieldbus to input power: 250V AC rms withstand  
Segment to segment: 200V DC withstand

### ALARMS

#### Alarm contact rating

1A maximum @ 30V DC maximum

#### Alarm contact status

Normally closed

#### Alarm threshold

	F801	F802
Segment output	<19V DC	<24V DC

### ELECTRICAL CONNECTIONS

#### System connectors

Host 1A, Host 1B, Host 2A, Host 2B via AKB336 cables to ALF111 modules

#### Fieldbus Wiring

Segments 1-8, 2-way barrier strip for use with ring terminals.

#### Fieldbus Power Input

Power A, Power B, 2-way barrier strip for use with ring terminals

#### Chassis ground and Alarm contacts

2-way barrier strip for use with ring terminals

**Note:** Barrier strip supports up to 8mm ring terminals with hole sizes from 3.5mm to 5.0mm

### ENVIRONMENTAL

	F801	F802
<b>Ambient temperature</b>		
Operating (full load)	-40°C to +65°C	-40°C to +50°C
Operating (60% load)	-40°C to +65°C	-40°C to +65°C
Storage	-40°C to +85°C	-40°C to +85°C

*Note:* Temperature range applies only when mounted on a vertical DIN rail.

#### Ingress protection

IP20 to BS EN60529 (Additional protection by use of enclosure)

### MECHANICAL

#### Mounting method

Integrated fixings for 'Top hat' DIN rail, 35mm x 7.5mm to EN50022

#### Weights

F801:	1.45kg
F802:	1.50kg
F880-CA-RT:	0.92kg

### ELECTRICAL

#### EMC Compliance

To EN61326:1998 Electrical equipment for measurement, control and laboratory use - EMC requirements

## F880 - BLOCK DIAGRAM

The above diagram shows a block diagram of how the F880-CA-RT is wired. Note that the Chassis Ground and Alarm connection are not shown. The Diagnostic module is also not shown (see the F809F product specification).

For detailed wiring information see the Installation Instructions for the F880-RT (Document number 502-139).

### PHYSICAL NETWORKS

IEC61158-2  
ISA-S50.02 Part 2-1992  
FOUNDATION™ fieldbus H1  
Profibus PA

### ORDERING INFORMATION

#### DESCRIPTION

Carrier, unpopulated

8-segment power module: 21.5V, 350mA

8-segment power module: 28V, 500mA

F880-CA-RT and two F801 modules

F880-CA-RT and one F801 module

F880-CA-RT and two F802 modules

F880-CA-RT and one F802 module

Blanking modules included with -NR systems

Fieldbus diagnostic module
