

High definition IS Ethernet
camera for enhanced
visibility in hazardous areas

EATON

Powering Business Worldwide

The first of a new generation

Providing additional safety and visibility in hazardous locations

New

Eaton's new **MTL RUGICAM-IP** High Definition (HD) Intrinsically Safe (IS) Ethernet network camera enables users across process industries worldwide to ensure they are operating safely in harsh and hazardous environments.

The first of its kind for the hazardous area market, the MTL RUGICAM-IP is ideal for remote monitoring using Internet Protocol (IP) connectivity and provides enhanced safety with clear visualisation of conditions in the process area. Its lightweight, compact and rugged design alongside simple mounting allows for easy installation wherever monitoring is required within a Zone 0, 1 or 2 hazardous area.

The MTL RUGICAM-IP offers flexible connectivity options for easy integration into the site network via WiFi or a compatible IS Ethernet network with a standard Cat5e cable. The fully IS design ensures safe device and network maintenance. WiFi connectivity provides an ideal solution for remote inspections via a hazardous area approved mobile device or for moving machinery applications. This reduces the risk for operators by eliminating the need to enter confined spaces or work in close proximity to moving machinery without compromising on the view of the critical equipment.

Key:
— Copper cable — IS copper cable --- IS power connection
— Fibre optic cable --- Power connection

Enhancing visual safety in hazardous areas

Providing extra security for safe operation

Easy integration into existing networks

Key features

➤ **Compact, rugged design** with IP66 rated enclosure for optimisation of space and minimum level of maintenance even in the harshest environments.

➤ **Ethernet or WiFi connectivity** allows easy access through the existing network infrastructure.

➤ **Full HD 1080P resolution** for high quality visualisation in process monitoring and inspections.

➤ **Video streaming & recording** supported with selectable frame rate to optimise network bandwidth usage and Micro-SD for local recording of trigger events.

➤ **Flexible powering** with unique PoEx™ feature providing power and communication over single cable.

➤ **Optional Infra Red (IR) or white LED accessories** provide high quality images in low light locations.

MTL RUGICAM-IP LED unit

MTL intrinsically safe power supplies

The 949x-PS-PLUS range of MTL Intrinsically Safe (IS) isolated power supplies are ideal for providing power to the MTL RUGICAM-IP and instrumentation in hazardous process areas.

The 949x-PS-PLUS range can be used with the 946x-ET range of MTL IS Ethernet devices to provide direct IS power or Power over Ethernet (PoEx™), a method which allows a single cable to provide both the data connection and electrical power to devices, reducing installation costs.

They also offer a wide range of different IS output voltages, ranging from 4.8V - 17.7V, delivering flexible options for a variety of applications.
